Appendix

1. Service Area

The service area for tt mobile communication services shall be within the areas designated by the specified mobile phone carrier.

2. Provision of Ancillary Services

(1) Time Announcement Service

A. The Company shall provide the time announcement service as follows.

Category	Details	Phone Number
Time Announcement Service	Service providing time notifications based on Japan Central Standard Time	117

B. For a time announcement call, the call will be terminated between 6 minutes and 12 minutes after the time when the caller is ready to hear the announcement.

(2) Information Provision Service

A. The Company provides the Information Service as follows.

Distinction	Content
Information Provision Service	A service that allows users to receive pre-prepared information by utilizing the tt mobile communication service (limited to dual-type).

B. Information provided through the Information Service is created by parties separately designated by the Company.

C. For each piece of information created, the Company shall determine its content, telephone number, and service selection number.

D. The Information Provision Service is provided only for calls originating from the subscriber's line.

E. The time periods during which the Information Provision Service can be used may be restricted as separately determined by the Company.

f) The Information Provision Service may terminate a call if the time specified separately by the Company elapses after the call is placed in a state where the information can be heard.

(h) The subscriber shall pay the charges calculated based on the call duration measured according to the provisions of Appendix 13 (Measurement of Call Duration, etc.) and the provisions of Table 1, Section 3 (Call Charges) of the Rate Schedule for calls using the information service.

(d) The Company shall not be liable for any damages arising from the content of information provided through the Information Service.

(3) Speed Dial Connection

For calls received on subscriber lines, etc., as separately specified by the Company, the Company shall connect such calls via a short dial number (meaning a short-digit connection number assigned by the Company) as separately specified by the

Company.

(4) Mobile Number Portability

A. Regarding the subscriber identification number specified by the Company pursuant to Article 12 (Subscriber Identification Number), Paragraph 1, any person wishing to exercise mobile phone number portability must notify the Company of this intention using the method specified by the Company when applying for a tt mobile contract (limited to the Dual Type; the same applies hereinafter in this (4)).In this case, the person making the request must be the same individual who had concluded the contract with the mobile phone carrier for that telecommunications number (including persons meeting criteria separately specified by the Company). Note that depending on the plan details, the assignment of numbers required for mobile phone number portability procedures may be restricted. Such numbers shall become invalid 15 days after the date the Company issued them.

(b) Except as provided in Article 12 (Subscriber Identification Number), Paragraph 2, the Company may change the telephone number if it determines that the information submitted by the tt mobile subscriber based on the provisions of (a) is not factual.

(c) If a tt mobile subscriber wishes to terminate their tt mobile contract and desires mobile number portability, they must notify us of this intention using the method separately specified by us prior to terminating the tt mobile contract. However, this notification cannot be made if the tt mobile subscriber falls under any of the following items:

(a) When terminating the tt mobile contract using the initial contract termination option. (This excludes cases where the telecommunications number subject to mobile number portability was transferred via mobile number portability from a telecommunications carrier other than the Company.)

(b) If the subscriber is currently delinquent in paying fees or other obligations related to the contract to be terminated, or is likely to become delinquent.

(d) When a request is made by a tt mobile subscriber based on the provisions of (c), the Company shall issue the number required for the mobile number portability procedure.

(e) The number issued by the Company pursuant to the provisions of (d) shall become invalid 15 days after the date the Company issued such number.

(f) The tt mobile subscriber shall manage the number issued by the Company pursuant to the provisions of (e) with the care of a prudent manager.

(h) When making a request under (c), the tt mobile subscriber shall not be required to pay the mobile phone number portability handling fee or the MNP transfer contract termination fee.

(d) Persons requesting mobile phone number portability must consent to the Company, when performing procedures related to mobile phone number portability, exchanging or inquiring about the following information with the mobile phone carrier involved in the portability: the name, address, date of birth, and other information necessary for the

procedure, such as the subscriber name, address, date of birth, the number issued by the Company pursuant to the provisions of (e), or the number issued by the mobile phone carrier, in order to determine whether to accept the request from that person.date of birth, the number issued by us pursuant to the provisions of E or the number issued by the mobile phone carrier, and other information necessary for the procedure.

If the tt mobile contract is terminated during the implementation of the mobile phone number portability procedure, the telecommunications number may be lost, or the implementation of such procedure may not be completed.

(f) If the telecommunications carrier providing mobile phone services changes to a carrier other than our company due to mobile phone number portability, the tt mobile contract shall be terminated.

(５) Use of Telegraph Services Provided by Partner Companies

(a) The tt mobile subscriber may use the telegram service based on the terms and conditions of the agreement provider separately specified by the Company by making a regular call from the subscriber line of the tt mobile communication service (limited to the Dual Type).

B. The tt mobile subscriber agrees that the Company may assign to itself any receivables related to the telegram service (including charges for interconnection communications made to use the telegram service) incurred when the Company uses the telegram service pursuant to the preceding paragraph (except when such use is conditional upon payment of the relevant charges for the telegram service by credit card), and may combine the amount of such receivables with the charges and bill the subscriber.

(c) In the case described in the preceding paragraph, the Company and the Agreement Operator shall omit individual notification to the subscriber or a request for approval of the assignment.

(d) Claims assigned from the Agreement Operator pursuant to the provisions of (a) shall be handled in accordance with the provisions of Article 49 (Surcharges), Article 50 (Delinquency Interest), and the General Rules of the Fee Schedule.

3. Methods of Notification, etc., from the Company to tt mobile Contract Holders and Obligation to Report Changes in Name, etc.

(１) When the Company needs to notify or otherwise communicate with a tt mobile subscriber pursuant to the Terms and Conditions (hereinafter referred to as "Notifications, etc." in this Appendix 3), and when such Notifications, etc. are made in writing or by other methods separately specified by the Company, they shall be made based on the name, address, email address, and information related to the subscriber number (hereinafter referred to as "Subscriber Contact Information") provided by the tt mobile subscriber.

(２) tt mobile subscribers shall promptly notify the service handling office separately designated by the Company of any changes to their Subscriber Contact Information.

(３) Upon receiving a notification as described in (2), the Company may request the

Subscriber to present documentation proving the fact of the notification.

(4) tt mobile subscribers agree that any written notice sent by us to the subscriber's previous contact information due to the subscriber's failure to provide the notification described in (2) shall be deemed to have been received by the tt mobile subscriber at the time it would normally have been delivered, even if the notice was not actually delivered.

(5) The same shall apply to documents sent by us to the subscriber contact address provided in (4) if the tt mobile subscriber provided inaccurate information.

(6) If the Company determines that the notified subscriber contact information is inaccurate due to the return of documents sent to that address or for other reasons, the Company shall cease sending written notifications thereafter.

(7) In cases falling under (6) where the Company decides not to send written notifications, etc., the Company shall provide such notifications, etc., by calling the subscriber line or by other methods separately specified by the Company.In such cases, if the notice is recorded on the answering service function provided for that subscriber line or on the answering machine function built into terminal equipment connected to that subscriber line, or if the notice is made available to the tt mobile subscriber via email or other means such that the subscriber can receive it, the notice shall be deemed to have reached the tt mobile subscriber, regardless of whether the subscriber actually received it.

(8) If we suspend the use of the tt mobile communication service for a subscriber line pursuant to Article 29 (Suspension of Use) or terminate the contract pursuant to Article 17 (Termination of Contract by Us), and we are unable to provide notice, etc., by either written notice or the method specified in (7), we may omit such notice notwithstanding these provisions.

(9) The tt mobile subscriber agrees that the Company shall bear no responsibility whatsoever for any damages arising from the Company having provided notifications, etc. based on the information pertaining to the subscriber's contact details, in the event the subscriber fails to make the notification under (2) or provides the Company with a notification that is not factual.

4 Succession of Subscriber Status

(1) W hen succession of the status of a tt mobile subscriber occurs through inheritance, the heir shall promptly notify the relevant tt mobile communication service office, attaching the documents specified by the Company as proof of succession, the documents separately specified by the Company as proof of identity for the person acknowledged by the Company as the successor to the status of the tt mobile subscriber, and the documents separately specified by the Company for identity verification of that person.

(2) In case (1), if two or more persons succeed to the status, one of them shall be designated as the representative to the Company and notified accordingly. The same shall apply if this designation is changed.

(3) Until notification of a representative under provision (2) is received, the Company shall treat one of the persons succeeding to the status as the representative.

(4) If the tt mobile subscriber fails to make the notification under (1), they agree to be treated in accordance with the provisions of Appended Note 3 (4) to (9).

5. Inspection in Cases of Terminal Equipment Malfunction, etc.

(1) When necessary due to abnormalities in terminal equipment connected to the subscriber line or other circumstances hindering the smooth provision of telecommunications services, the Company may request the tt mobile subscriber to undergo an inspection to verify whether the connection of such terminal equipment complies with technical standards, etc. In such cases, the tt mobile subscriber shall consent to the inspection, except where there is a valid reason or other circumstances specified in Article 32, Paragraph 2 of the Enforcement Regulations of the Telecommunications Business Act (Ministry of Posts and Telecommunications Ordinance No. 25 of 1985; hereinafter referred to as the "Enforcement Regulations").

(2) When conducting the inspection described in (1), our personnel will present the prescribed certificate.

(3) If, as a result of the inspection described in (1), the terminal equipment is found not to comply with technical standards, etc., the tt mobile subscriber shall discontinue the connection of that terminal equipment to the subscriber line.

6. Inspection in Cases of Abnormalities in Self-Operated Telecommunications Equipment

Inspections for abnormalities in self-operated telecommunications equipment connected to the subscriber line or other cases where there is an impediment to the smooth provision of telecommunications services shall be handled in accordance with the provisions of Appendix 5.

7 Technical Standards, etc., to Which Terminal Equipment and Self-Operated Telecommunications Equipment Must Conform

Technical Standards, etc.
Terminal Equipment Regulations (Ministry of Posts and Telecommunications Ordinance No. 31 of 1985)

8. Handling of Orders to Cease Radio Wave Emissions from Terminal Equipment

(1) When the Company is temporarily ordered by the Minister of Internal Affairs and Communications to cease radio wave emissions for terminal equipment (limited to mobile wireless devices; the same applies hereinafter in this Appendix 8) connected to the subscriber line, based on the provisions of the Radio Act (Act No. 131 of 1950), the tt mobile subscriber shall cease using such terminal equipment and perform repairs or other necessary actions to ensure compliance with the Radio Equipment Regulations (Regulation No. 18 of 1950 of the Radio Regulatory Commission).

(2) Upon completion of the repairs, etc., as described in (1), the Company shall undergo inspections, etc., based on the provisions of the Radio Act, and the tt mobile subscriber shall consent to this, except where there is a valid reason.

(3) If the inspection under (2) determines that the terminal equipment does not comply with the Radio Equipment Regulations, the tt mobile subscriber shall disconnect that terminal equipment from the subscriber line.

9 Inspection of Terminal Equipment under the Radio Law

In addition to the inspections specified in Appendix 8, the procedures for inspections of terminal equipment (limited to mobile wireless devices) under the Radio Law shall be governed by the provisions of (2) and (3) of Appendix 8.

10. Handling in Case of an Order to Cease Radio Wave Transmission from Self-Operated Telecommunications Equipment

The handling of cases where a temporary order to cease radio wave emissions is issued for self-operated telecommunications equipment (limited to mobile radio devices) shall be governed by the provisions of Appendix 8.

11 Inspection of Self-Operated Telecommunications Equipment under the Radio Law

The handling of inspections of self-operated telecommunications equipment (limited to mobile radio devices) based on the Radio Law shall be in accordance with the provisions of Appendix 9.

12 Standards for Newspapers and Similar Entities

Category	Standard
1 Newspaper company	A newspaper company that publishes a daily newspaper meeting all of the following criteria 1) It is widely distributed for the purpose of reporting or discussing political, economic, cultural, and other public matters. 2) The circulation for a single title must be 8,000 copies or more.
2 Broadcasting Operators	Core broadcasting operators, core broadcasting station providers, and general broadcasting operators as defined in Article 2 of the Broadcasting Act (Act No. 132 of 1950). (Those using wired telecommunications facilities for broadcasting are limited to those conducting independent broadcasting, excluding those conducting only radio broadcasting.)
3 News Agency	A news agency whose primary purpose is to supply news (meaning news or information, excluding advertisements, published in a daily newspaper meeting all the criteria in Column 1 or broadcast by a broadcasting operator) to newspapers or broadcasting operators.

13 Measurement of Call Duration, etc.

(1) Call duration for calls other than those specified in (2) shall be measured as follows:

(a) Call duration shall be calculated from the time both subscribers' lines are connected and ready for communication until the time the call is ended by the sender or receiver hanging up the handset or otherwise signaling the end of the call, rendering the line unavailable. This duration shall be measured by our equipment (including that of specified mobile phone carriers). However, call duration for calls connected via telephone directory assistance shall be measured by the telephone directory assistance provider's equipment.

b. The following periods shall not be included in the call duration described in a.

(a) Time during which the call could not be completed temporarily due to reasons not attributable to the caller or recipient, such as line failure

(b) When a call is terminated due to reasons not attributable to the caller or recipient, such as a line failure, any fractional call time less than the number of seconds specified in Table 1, Item 3 (Call Charges) of the applicable rate schedule.

(2) The number of text messages sent using the SMS function shall be the number of times our telecommunications equipment (including that of specified mobile phone carriers) receives information indicating the transmission of a text message using the SMS function from the sender's subscriber line, as separately determined by us, and shall be measured by our equipment (including that of specified mobile phone carriers).

14 Measurement of Data Communication Volume, etc.

The data communication volume used by the tt mobile subscriber shall be measured by our equipment (including that of specified mobile phone carriers).

15 Handling When Call Charges Cannot Be Correctly Calculated Due to Equipment Failure, etc.

(1) If call charges cannot be correctly calculated due to failure of our equipment, etc., the following shall apply.

A In cases other than (a)	The amount obtained by multiplying the number of days during which charges could not be calculated by the lowest value of the daily average call charges calculated by our company using a method separately determined by us based on available actual usage data.
B When actual usage data for the past year is available	The amount obtained by multiplying the lowest daily average call charge among the previous twelve billing months (including the first day of the billing month in which the first day cannot be determined, or the day deemed to be the start of the equipment failure based on a comprehensive assessment of various circumstances) by the number of days during which the call charge could not be calculated.

(2) In case (1), if special circumstances exist, the circumstances shall be taken into

consideration in consultation with the tt mobile subscriber.

16 Exemption from Contract Termination Fee Payment Obligation

The Company shall exempt the payment of the fee specified in Table 1, Item 1 (Basic Usage Fee) of the Fee Schedule when the Company terminates a tt mobile contract in a manner separately specified by the Company and simultaneously enters into a new tt mobile contract with the Company.

17 Prohibited Acts in Using the tt mobile Communication Service

(1) Acts that infringe upon or may infringe upon the intellectual property rights (patent rights, utility model rights, copyrights, design rights, trademark rights, etc.) or other rights of the Company or others

(2) Acts that infringe upon or may infringe upon another person's property, privacy, or portrait rights

(3) Acts that unfairly discriminate against, slander, defame, or insult others; promote unfair discrimination against others; or damage the reputation or credibility of others

(4) Acts that lead to or may lead to criminal activities such as fraud, obstruction of business, abuse of controlled substances, child prostitution, or illegal trading of bank accounts and mobile phones

(5) Acts of transmitting or displaying images, videos, audio, or documents equivalent to obscenity, child pornography, or child abuse; acts of selling media containing such content; or acts of displaying or transmitting advertisements that evoke the transmission, display, or sale of such content

(6) Acts highly likely to lead to or be linked to drug crimes, controlled substances, designated drugs, items subject to advertising prohibition notices (items widely prohibited from advertising, etc., by notice as suspected designated drugs, etc.), or the abuse of so-called dangerous drugs containing these; acts advertising unapproved or expired pharmaceuticals, etc.; or acts selling pharmaceuticals, etc., prohibited from sale on the internet

(7) Advertising individuals of rare wild animals and plants subject to advertising restrictions for the purpose of sale or distribution

(8) Advertising the lending of money without being registered to operate a money lending business

(9) Business practices that violate or are likely to violate the law (e.g., establishing, operating, or soliciting participation in pyramid schemes (Nezumi-kō), or engaging in fraudulent multi-level marketing schemes)

(10) Establishing, operating, or using an Internet dating service (dating site) in a manner that violates laws and regulations, or is likely to do so

(11) Tampering with or deleting information stored on our facilities or information accessible through the tt mobile communication service

(１２) Unauthorized access or acts that encourage unauthorized access, and acts of using the tt mobile communication service by impersonating a third party to attempt unauthorized access to our telecommunications facilities (including acts of manipulating parts such as email headers for the purpose of impersonation)

(１３) Acquiring personal information through deception or other improper means

(１４) Sending harmful computer programs such as viruses, or making them available for others to receive

(１５) Acts that disrupt the flow of on-screen interactions or may adversely affect other subscribers' attempts to operate or input data in real time

(１６) Sending emails that are likely to cause disgust to others according to social norms, or that may cause such disgust

(１７) Sending unsolicited advertising, promotional, or solicitation emails to others

(１８) Acts that interfere with or may interfere with the use or operation of telecommunications equipment belonging to the Company or others

(１９) Conduct that involves engaging in illegal gambling or soliciting participation in illegal gambling

(２０) Acts of contracting, brokering, or inducing (including requesting others to do so) illegal activities (such as transferring firearms, illegally manufacturing firearms or explosives, providing child pornography, forging public documents, murder, or threats)

(２１) Transmitting to an unspecified number of persons information that is cruel, such as images of murder scenes, information containing images of killing or abusing animals, or other information that is likely to cause significant disgust to others according to social norms

(２２) Acts of inducing or soliciting suicide, or acts such as introducing methods of suicide that carry a high risk of harm to third parties

(２３) Reselling or transferring communication volume to other tt mobile subscribers or others for profit

(２４) Posting links in a manner or for the purpose of promoting any of the above acts, knowing that such acts fall under any of the preceding items

(２５) Other acts determined by us to violate public order and morals or significantly infringe upon the rights of others

(２６) Other acts deemed inappropriate by us

18 Handling of Mass Email (Including SMS) Transmission

When emails (including SMS) are sent from a subscriber line under Item 1 using the email (including SMS) function in quantities exceeding those separately specified by the Company, the Company shall treat such acts as falling under the provisions of Item 17. However, this shall not apply if the relevant tt mobile subscriber declares that the sending act does not fall under the relevant provision and the Company acknowledges that it does not fall under the relevant provision.

19 Connection of Self-Provided Terminal Equipment

(1) T he subscriber (excluding roaming subscribers; the same applies hereinafter in this Appendix 19) shall, when connecting self-owned terminal equipment (limited to equipment capable of connecting to the subscriber line of the tt mobile communication service and confirmed by the Company, etc., to be compliant with the Radio Equipment Regulations and technical standards, etc., through the following a) and b) markings (hereinafter referred to as the "Technical Compliance Mark") to the subscriber line or via telecommunications equipment connected to the subscriber line) to the subscriber line or via telecommunications equipment connected to the subscriber line, submit a request for connection to a service handling office separately designated by the Company using the Company's prescribed written form.The same shall apply hereinafter in this Appendix 19.) to the subscriber line or to telecommunications equipment connected to the subscriber line, the subscriber shall submit a request for such connection to a service handling office separately designated by the Company using the Company's prescribed form.

(a) Form No. 7 or No. 14 of the Regulations Concerning Technical Standards Compliance Certification for Specified Radio Equipment (Ministry of Posts and Telecommunications Ordinance No. 37 of 1981)

Form No. 7 or No. 14

(b) Form No. 7 or No. 14 of the Regulations Concerning Certification of Conformity to Technical Standards for Terminal Equipment (Ministry of Internal Affairs and Communications Ordinance No. 15 of 2004)

or Form No. 14

(2) The Company shall accept the request under (1) except in the following cases:

A. When the terminal equipment to be connected does not conform to the Radio Equipment Regulations.

B. When the connection does not comply with the technical standards, etc., specified in Appendix 7.

C. The connection falls under the cases specified in Article 31 of the Enforcement Regulations of the Business Act.

(3) When accepting a request under (2), the Company shall inspect whether the terminal equipment used for the connection complies with the Radio Equipment Regulations and technical standards, etc., except in the following cases:

A. When compliance with the Radio Equipment Regulations and technical standards, etc., can be confirmed by the technical compliance mark.

B. When the case falls under the provisions of Article 32, Paragraph 1 of the Enforcement Regulations of the Business Act.

(4) When performing the inspection under (3), our personnel shall present the prescribed certificate.

(5) When the subscriber changes their terminal equipment, the provisions from (1) to (4) shall apply mutatis mutandis.

(６) When the subscriber discontinues the connection of terminal equipment to their subscriber line, they shall notify the service handling office separately designated by the Company.

20 Connection of Self-Operated Telecommunications Equipment

(１) tt mobile subscribers shall, when connecting their own telecommunications equipment (in the case of mobile wireless devices, limited to those that can be connected to the subscriber line of the tt mobile communication service and for which our company, etc., can confirm compliance with the Radio Equipment Regulations and technical standards, etc., through the following A and B markings (hereinafter referred to as the "Technical Compliance Mark")), to their subscriber line or via telecommunications equipment connected to their subscriber line, submit a request for connection to a service handling office separately designated by our company using a form prescribed by our company.The same shall apply hereinafter in this Appendix 20.) to their subscriber line or to telecommunications equipment connected to their subscriber line, they must submit a request for such connection to a service handling office separately designated by us using the prescribed written form.

(２) The Company shall approve such requests, except in the following cases:

(a) When the terminal equipment to be connected does not comply with the Radio Equipment Regulations.

(b) The connection does not comply with the technical standards, etc., specified in Appendix 7.

(c) When the Minister of Internal Affairs and Communications has certified that the connection would make it operationally difficult for the Company to maintain its telecommunications line facilities.

(３) When accepting a request under (2), the Company shall inspect whether the connection complies with the Radio Equipment Regulations and technical standards, etc., except in the following cases:

A. When compliance with the Radio Equipment Regulations and technical standards, etc., can be confirmed by the technical compliance mark.

(b) When the case falls under the provisions of Article 32, Paragraph 1 of the Enforcement Regulations of the Business Act.

(４) When conducting the inspection under (3), our personnel shall present the prescribed certificate.

(５) When the subscriber modifies their self-operated telecommunications equipment, the provisions from (1) to (4) shall apply mutatis mutandis.

(６) When the subscriber discontinues the connection of self-operated telecommunications equipment to their subscriber line, they shall notify the service handling office separately designated by the Company at .

21 Our Maintenance Responsibility

The Company shall maintain the telecommunications equipment it has installed in compliance with the Business Telecommunications Equipment Regulations (Ministry of Posts and Telecommunications Ordinance No. 30 of 1985).

22 Bringing Terminal Equipment for Inspection, etc.

tt mobile subscribers shall bring their terminal equipment (limited to mobile radio devices) or self-operated telecommunications equipment (limited to mobile radio devices) to the tt mobile communication service handling office or a location designated by the Company on the date specified by the Company in the following cases:

(1) When undergoing inspection of terminal equipment based on the provisions of Appendix 5 or 19.

(2) When undergoing inspection of terminal equipment or self-operated telecommunications equipment based on the Radio Law.

23 Handling of Interconnection Communication Charges

Fees for interconnection communications conducted via the connection types specified in Appendix 24 shall be determined by the fee-setting carrier specified in Appendix 24 in its contract terms and conditions, etc., collectively with fees for communications with other networks. Other fee-related matters, such as billing, shall be handled as specified in Appendix 24.

3 Plan A Type 2 Dual Type	SMS function, international roaming function
4 D Plan Dual Type	SMS function, nuisance call rejection function, international roaming function
5 S Plan Dual Type	SMS Function

30 Standard Features

Type	Provision Conditions
1 Automatic Call Forwarding Function (Call Forwarding Service / Call Forwarding Service)	This function automatically forwards calls received on the subscriber line to another subscriber line or other designated line (limited to those separately specified by the Company).

	Preparation Considerations	(1) This service is provided only for subscriber lines of the tt mobile communication service (limited to those using mobile wireless devices separately specified by us). (2) The subscriber of the subscriber line using this function shall be responsible for the charges incurred for calls forwarded via this function. (3) When using this feature, if the call is forwarded two or more times or used in an unusual manner, call quality cannot be guaranteed. (4) For calls to subscriber lines using this feature and calls forwarded via this feature, if the exchange equipment cannot confirm the location of the mobile wireless device connected to the subscriber line (e.g., due to poor signal reception), the call will be treated as a call to the mobile wireless device located in the last confirmed area. (5) Other terms and conditions for providing this feature shall be as separately stipulated by the Company.
2 Caller ID Request Function (Caller ID Request Service / Caller ID Request Service)	This function notifies the caller of an incoming call to the subscriber line where the caller ID is not displayed, requesting that the caller redial with their number displayed.	
	Preparation Considerations	(1) This service is provided only for subscriber lines of the tt mobile communication service (limited to those using mobile wireless devices separately specified by the Company). (2) The party obligated to pay charges as stipulated in Article 42 (Obligation to Pay Call Charges) and Article 51 (Handling of Interconnection Communication Charges) shall pay the charges for calls answered using this function. (3) Other conditions for providing this function shall be as separately specified by the Company.

31 Relay Service Providers Notifying Subscriber Names, etc.

SoftBank Corp., NTT Communications Corp.

32 Telecommunications Carriers Notifying Subscriber Name Information

NTT DOCOMO, INC., KDDI Corporation, Okinawa Cellular Telephone Company, SoftBank Corp., WILLCOM OKINAWA, INC., Rakuten Mobile, Inc., AEON Retail Co., Ltd.

33 Handling of Large Volumes of Outgoing International Calls

When international call functions are used to make calls from a subscriber line under Item 1 that exceed the volume separately specified by the Company, the Company will treat this as equivalent to an act falling under Appendix 17. However, this shall not apply if the tt mobile subscriber declares that the calling activity does not fall under the

relevant clause and the Company acknowledges that it does not fall under the relevant clause.

34 KT Prepaid SIM

(1) If a tt mobile subscriber applies to use a KT Prepaid SIM alongside the tt mobile communication service, they must separately complete user registration for the KT Prepaid SIM usage via a method specified by the Company. If the KT Prepaid SIM is not activated for use within South Korea within 90 days after user registration is completed, the use of that SIM may be restricted.

(2) tt mobile subscribers agree that the use of KT Prepaid SIMs shall be governed by KT Corporation's KT Prepaid SIM Terms of Service and related agreements, and that such use is permitted based on said Terms of Service. Furthermore, subscribers agree that usage fees and other contract terms may be changed without prior notice based on the KT Prepaid SIM Terms of Service, other agreements, or Korean laws, guidelines, and other government decisions.

Supplementary Provisions

(Effective Date)

These Terms and Conditions shall take effect on March 5, 2026.
